Pro-tips

for BGV

IDfy

Mitigate hiring risks with pre-onboarding checks

14-30 days is way too long to keep a potentially dangerous person in your system. Pre-onboarding checks give you a preliminary BGV result even before the candidate joins. Use them to stay protected.

IDfy

Reduce Employment Ambers with EPFO checks

Certain companies and HRs may simply refuse to respond to BGV requests. Use EPFO checks to close those 'Amber' cases.

IDfy

Use Digital Address Verifications for remote locations

Physically checking addresses in remote locations is difficult, time-consuming, and expensive. Use digital modes of address verifications like live video with location capture.
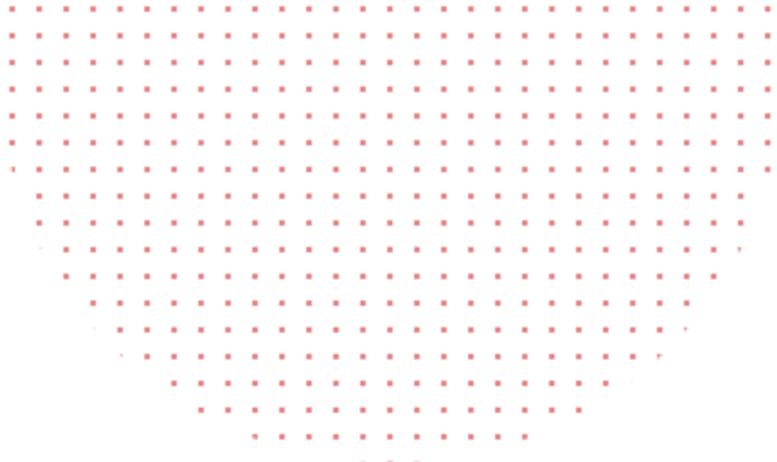

IDfy

Use WhatsApp with candidates

100% of the next-gen workforce uses WhatsApp every 23 mins. Use WhatsApp to collect documents, resolve insufficiencies, send reminders. It works!

Mobile friendly is candidate friendly

Candidates prefer
mobile to laptops.
Make your candidate
journey mobile-friendly.
They'll love you for it.

Forget passwords to replace 'Forgot password'

Clicking 'Forgot password' is probably the worst way to start an online journey. Spare your candidates. Use link-based journeys instead.
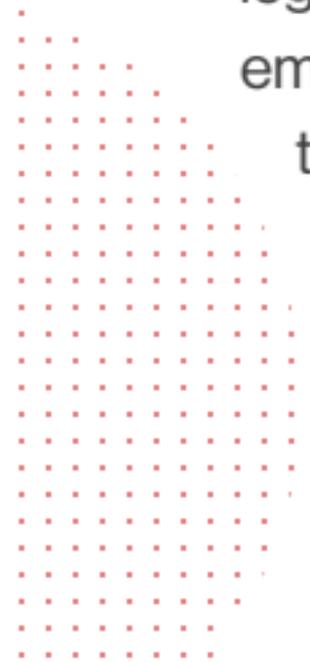

**ID**fy

Use Recurring Checks to stay protected

Your green BGV case can turn red while the person is on your rolls. Check your people for legal records and dual employment regularly to stay protected.
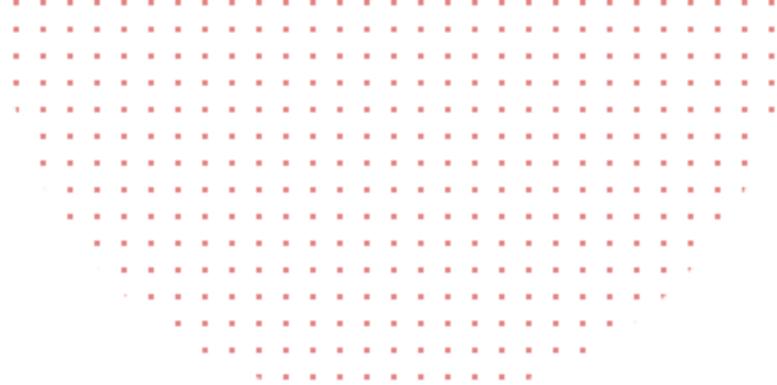

Expedite BGV with data and analytics

With data at your
fingertips, you can
diagnose BGV
problems on-the-go.
Plus, use the data
to take immediate
corrective actions to
reduce TAT.

IDfy

Detect forged documents instantly

65% of fraud cases in education checks are due to forged documents. Use Tampering Dection software to weed out degree certificate forgery.

Do only the checks you need

Every industry has
its unique set of fraud
they deal with. Know the
checks you need and do
them on priority. To know
